

The logo for SearchiVix features the word "Search" in black, followed by a stylized "i" that is a vertical bar with a circular top, colored in a gradient from purple to orange. This is followed by the word "Vix" in black. The background includes a network of grey dots and lines, and three large, rounded rectangular shapes: an orange one at the top left, a purple one on the right, and a red one at the bottom left.

SearchiVix

Text Finder & Analyser Tool

**Revolutionize how you
search, manage, analyse
and collaborate on
documents**

SearchiVix is an AI-based tool that allows you to organise, retrieve, analyze and share information available in multiple document formats.

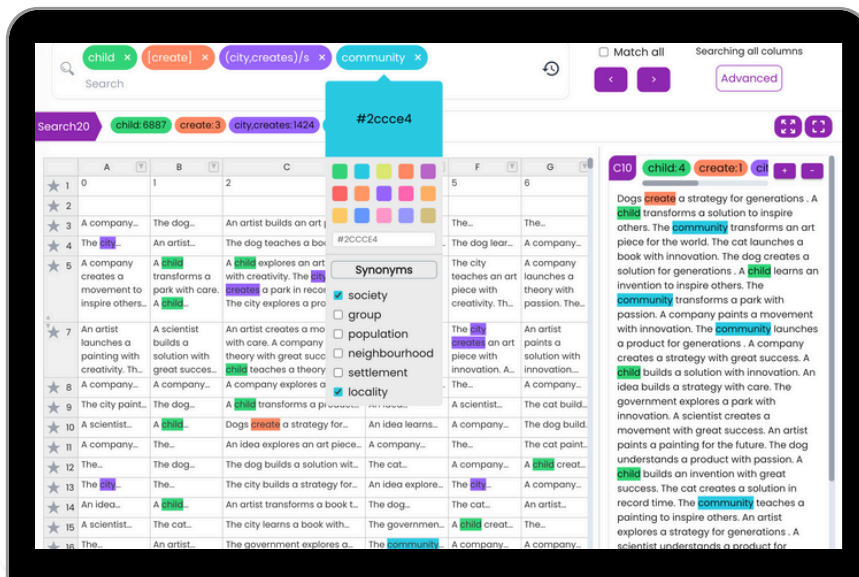

Overview

SearchiVix is a powerful research tool designed to simplify and accelerate your information retrieval process. With the ability to search across diverse document formats, including MS Word, MS Excel, PDFs, and Web Pages, SearchiVix provides comprehensive access to the relevant information you need.

Its advanced AI-enabled search features, such as synonyms, proximity, and keyword highlighting, ensure precise and relevant results. User-friendly and customizable layouts for viewing and editing information, along with collaborative workspaces for team sharing, enhance your workflow and efficiency. Additionally, SearchiVix enables you to quickly extract critical data from large datasets, saving you valuable time and effort on your research.

Search Smarter, Work Faster

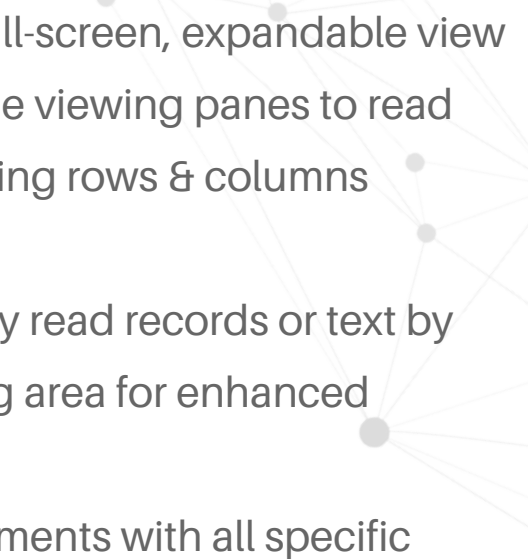

Our **AI-powered** advanced version takes it further, adding **proximity searches, synonym identification, language translations, and document summarization** for even greater accuracy and efficiency.

Features

- **Multiple Keyword Highlighting:** Highlight multiple research keywords/phrases (search criteria), assigning unique colors to each keyword. This feature enables users to read, review and extract relevant information from large data set and multiple files efficiently.
- **Advanced Search:** Users can perform a column or page-specific search and filter keywords and use AI-generated or user-defined synonyms to help narrow down their analysis to the most relevant and important information.
- **Search Syntax:** Allow users to use multiple text based search syntax with operators such as exact/ partial match, proximity and more within the same query for more refined searches.
- **Mark and Extract Relevant Information:** Identify and save meaningful data into separate documents and download them for offline access for streamlining insights and presentation
- **Keyword Density:** Displays the count for each keyword at different levels of viewing the documents to help in quick decision-making process of identifying relevant information.
- **Keywords History:** Offers users to maintain keyword search history, allowing them to reuse search strategies with single click for faster and more consistent research and analysis.
- **Comments, Red-lining & Notes:** Annotate Word and PDF documents for thorough reviews, edits, and information contextualization.

- 
- **Adjustable Layouts & Navigation:** Offers full-screen, expandable view and more customizable options such as large viewing panes to read and analyze records/ content with ease. Hiding rows & columns eliminates irrelevant data.
 - **Large Reading Pane:** Enables users to easily read records or text by providing a spacious and adjustable viewing area for enhanced comfort and clarity.
 - **File Downloads:** Users can download documents with all specific keyword queries, individual highlight colors, and edits preserved, ensuring a seamless offline review and presentation experience.
 - **Personalized Workspaces:** Empower researchers to work independently on their files/documents, focusing on key interest areas.
 - **Google Web and Patent Search:** Enhances research with direct access to web-based search capabilities. Provides access to a vast repository of patent information, ideal for IP Analysts and Researchers.
 - **Collaboration:** Facilitates team collaboration on common or critical keyword queries and search strategies, individual documents, and workspaces, making it easier for users to share and reuse search strategies and documents for consistent research and analysis.
 - **Usage Statistics** allows the admin to view storage utilization, last login, and number of files in user workspaces.
 - **Cloud Security & Storage:** 99.9% uptime with a highly secure & confidential environment to store your research documents in the cloud, enabling seamless access and review of documents anytime, anywhere, across devices.
